**Notice of Amendment of Network Entry Provisions between
National Gas Transmission and PX (TGPP) Limited and
National Gas Transmission and CATS North Sea Limited
Amendments to the Carbon Dioxide Limits at the Teesside NTS System Entry Points
18/11/2024**

Dear Sir/Madam,

This notice:

- **Is given to you by National Gas Transmission.**
- **Is given under the Uniform Network Code, Transportation Principal Document, Section I, paragraph 2.2.6(a).**

UNC Modifications 0498 and 0502 provide for NGT to agree to increase the permitted carbon dioxide limits at the Teesside NTS System Entry Points from 2.9mol% to 4mol%. The parties to the Network Entry Agreements (NEAs) have agreed to implement this amendment on an enduring basis into the NEAs as soon as is reasonably practicableⁱ.

In advance of this, Px (TGPP) and CATS North Sea Limited have requested, and National Gas Transmission has agreed, to implement this change on a temporary basis between 19th November 2024 and 24th November 2024.

A further notice will be issued to Users as and when an enduring change to increase carbon dioxide content within Teesside NEA(s) has been agreed between NGT and the relevant Delivery Facility Operator.

Yours faithfully,

Natalie Ellard
