UNIFORM NETWORK CODE – INDEPENDENT GAS TRANSPORTER ARRANGEMENTS DOCUMENT

SECTION G – UNMETERED IGT-NTS SYSTEM POINTS

1 INTRODUCTION

1.1 Permitted connection

1.1.1 National Gas Transmission will permit the connection of an IGT System to the NTS and the flow of gas at the NTS System Point at which it is connected, without a meter or measurement equipment for the purpose of measuring the volume or delivery characteristics of gas delivered to or offtaken from the NTS, where:

(a) in relation to gas delivered to the NTS, the requirements in paragraph 2 are met in relation to any facility (not being part of the Total System) connected to the IGT System from which gas can be delivered to the IGT System; and

(b) in relation to gas offtaken from the NTS, the requirements in Section B and paragraph 4 are met.

1.2 Interpretation

1.2.1 For the purposes of this Section G:

(a) an **"IGT Delivery Facility"** is a facility connected to an IGT System as referred to in paragraph 1.1,1(a);

(b) an "**iDFO**" is the operator of an IGT Delivery Facility.

2 REQUIRED ARRANGEMENTS (ENTRY)

2.1 Tripartite Agreement

2.1.1 There must be in force a tripartite agreement between the Independent Gas Transporter, the iDFO and National Gas Transmission (**"Tripartite Agreement"**), in form and substance acceptable to National Gas Transmission.

2.1.2 The Tripartite Agreement must provide for:

(a) arrangements in respect of the connection of and flows of gas from the IGT Delivery Facility to the NTS-Connected IGT System (including without limitation requirements as to quality, measurement and information flows) that are equivalent to Network Entry Provisions and Local Operating Procedures;

(b) the basis on which National Gas Transmission:

(i) will receive information provided by the iDFO pursuant to those

arrangements as if the IGT Delivery Facility were connected to the NTS and the subject of Network Entry Provisions;

(ii) may enforce or require the IGT to enforce those arrangements in order to ensure National Gas Transmission can operate the NTS in a safe and efficient manner and in compliance with the Code and its Transporter's Licence; and

(c) National Gas Transmission to have the power to amend the agreement unilaterally, upon any Code Modification, to ensure the agreement complies with and remains consistent with the Code following such modification.

3 NETWORK ENTRY AGREEMENT

3.1 Network Entry Provisions

3.1.1 The requirements of TPD Section I are modified in respect of an Unmetered IGT-NTS System Point as provided in this paragraph 3.

3.1.2 The Network Entry Provisions need not include Measurement Provisions.

3.1.3 The Network Entry may refer to provisions of the Tripartite Agreement and may provide that some or all of the delivery characteristics of gas delivered at the Unmetered IGT-NTS System Point are to be assumed to be the same as those of gas delivered at the IGTS System Entry Point.

4 REQUIRED ARRANGEMENTS (EXIT)

4.1 Network Exit Provisions

4.1.1 An Independent Gas Transporter will not permit the offtake of gas at an IGTS Supply Meter Point unless:

(a) the Independent Gas Transporter has provided National Gas Transmission with such details of the IGTS Supply Meter Point as National Gas Transmission requires; and

(b) an Agreement is in place and binding between the Independent Gas Transporter and the consumer or IGTS User in respect of the matters referred to in paragraph 4.1.2.

4.1.2 The Agreement referred to in paragraph 4.1.1(b):

(a) will require the installation and operation of calorimetric equipment by means of which gas offtaken at the IGTS Supply Meter Point may be continuously monitored;

(b) will provide for such other matters as notified to the Independent Gas Transporter by National Gas Transmission (being matters in respect of the

offtake of gas at the IGTS Supply Meter Point which are equivalent to those matters which National Gas Transmission would require (in accordance with TPD Section J) in relation to the offtake of gas at an NTS Supply Meter Point).

4.1.3 The Independent Gas Transporter shall provide National Gas Transmission with all the information obtained (whether directly or from the Independent Gas Transporter) pursuant to the Agreement under paragraph 4.1.2.
